

Physician Office Kit Update

As a result of concerns over access to certain personnel protective equipment (PPE), Alberta Health Service (AHS) has contracted vendor to provide Primary Care Physician Offices with two (2) supply kits. The kits include PPE and additional supplies as well as Infection Prevention and Control information and instructions on how to reorder subsequent supplies from the vendor. Delivery is expected to commence by early next week direct to physician offices in accordance with the list provided by the College of Physicians & Surgeons Registration Manager, Bruce Leisen. Should physicians require urgent supplies, the following vendors have advised AHS that they have supplies available for purchase. Orders must either be faxed or emailed direct to the locations provided below.
