

Signs of a “Grow House”

1. Residents only attend the home occasionally for short periods of time.

2. Equipment such as large fans, lights, plastic plant containers and soil are carried into the house at odd hours.

3. The exterior appearance of the property is untidy.

4. Entry is often made into the home using only the garage door to conceal activities.

5. Garbage containing used soil and plant material is discarded in surrounding areas.

6. Windows are covered to prevent light from entering the home and to conceal activities.

7. Bright light can be seen escaping from windows and windows are often covered in condensation.

8. Hydro meters are tampered with.

9. Sounds of construction and ventilation fans can sometimes be heard.

10. The growing marihuana produces a strong skunk-like odour that can be detected outside the home.
