Example situations:

- There is a small outdoor event with 24 people expected to attend.
 - This event would only require 1 temporary privy.
- There is an outdoor event with 500 people expected to attend.
 - Unless the exact numbers of male and female attendees are known, this event would require 12 temporary privies (must assume there will be 250 males & 250 females. 5 privies would be required for males and 7 privies would be required for females).

Note: *For the purposes of this table, unless the actual proportion of each sex attending the event can reasonably be anticipated, it shall be considered that attendance will be equally divided between the sexes.*

For events where higher numbers of people are expected, please contact the Special Events Coordinator at 403-943-2288 about temporary privy requirements.
